

V Series Mounting Bracket and Shelf

MBR-V1 / MBR-V2 / MBR-VBLANK

Our V Series Mounting Bracket and Shelf are used to mount hearing loop drivers to a 19" rack, and are suitable for mounting with existing equipment.

The V Series Shelf fits up to two V Series drivers, leaving only a 3mm gap between them for a neat display. When only one driver is placed in the shelf, one side is left exposed; a blanking plate is available for a neat finish, covering the gap.

Applications

For use with 19" equipment racks, such as:

- 6U Rack Cabinet

Physical Data

Single V Series Bracket	1U Depth – 135.8mm (5.34") Weight – 540g (1.19lbs) Construction – Mild Steel Finish – Black Powder Coated
V Series Shelf	1U Depth – 135.8mm (5.34") Weight – 760g (1.67lbs) Construction – Mild Steel Finish – Black Powder Coated
